

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
I decided to escalate the ticket after following the steps 3.0,3.1,3.2 of the phishing playbook. Some of the motivations are: Sender's mail and name do not match between them. Upon searching the hash value on VirusTotal is confirmed by many vendors as a trojan malicious threat. In the "subject Re:" section we can identify grammatical errors and misspellings for the role. File extension doesn't match what it should contain, an executable file for a resume is not a common manner.

Additional information

Known malicious file hash:
