

Incident handler's journal

Instructions

As you continue through this course, you may use this template to record your findings after completing an activity or to take notes on what you've learned about a specific tool or concept. You can also use this journal as a way to log the key takeaways about the different cybersecurity tools or concepts you encounter in this course.

Date: 2026/09/24	Entry: Record the journal entry number: 2.
Description	A security incident has been experienced on July 20, 2022 at 9:30:14 am. This incident involved an employee of the company opening and download a malicious file on their computer from a possible phishing mail. After investigating the email attachment file's hash, the attachment has already been verified as malicious.
Tool(s) used	Phishing Playbook v 1.0
The 5 W's	Capture the 5 W's of an incident. ● Who caused the incident? unknown external threat: "Def Communications <76tguyhh6tgftrt7tg.su> IP <114.114.114.114>" ● What happened? A malicious attachment downloaded in a phishing mail. ● When did the incident occur? July 20, 2022 at 9:30:14 am. ● Where did the incident happen? On an employee computer

	● Why did the incident happen? Someone downloaded the malicious attachment without recognising the phishing email. Motivations of the attack appear to be unknown.
Additional notes	Security training for employees should be put in place to avoid this type of situation and making the employees aware of how to handle this social engineering attacks.
